### Mounting Method

- ① Make a mounting hole in D+0.1 diameter.
- ② Provide a water cooling jacket in light of the following :  
Depth (ℓ) → L/3 or more  
Hole diameter → D×2 or more
- ③ We recommend that the MTJ grease be applied on the heat transaction pipe before inserting WHP into a mold.
- ④ The heat transaction pipe(WHP) must be inserted so that its end cap is on the cooling side.
